1. Abstract:

▪ Main Purpose

To facilitate tourist trips by organizing the reservation of individuals and their trips in all aspects (aviation, hotels, tour guide).

▪ Goals and Objective

Create a site to organize trips, and work in a team to divide the tasks and finish the project within a month.

▪ Methodology

- Log in.
- Sing up.
- Sign out.
- Pay.
- Hotel booking.
- Profile (Reset and Change Password, User, Email, Phone Number).
- Call the website support.
- Choose the trip guider.

▪ Result

A site for organizing tourist trips with all its services, with high quality and organization, as it displays and arranges the best hotels, tourist places, and tour guides, and trips start to Dammam and Jeddah.

2. Introduction

Planning an integrated trip is daunting, and we all think of the best travel destination and places or events that we can visit to enjoy during the trip.

Now, organizing your trip has become very easy. These specialized websites help you choose your suitable destination and meet all your requirements from planning the trip to booking and traveling for an enjoyable and comfortable tourism experience.

They are sites for creating integrated tourism programs and activities that are designed, marketed, and implemented, which helps to increase the internal tourism movement and the tourists to enjoy an excellent and safe tourism experience.

3. Background

There are several sites for organizing tourist trips, the most prominent of which are:

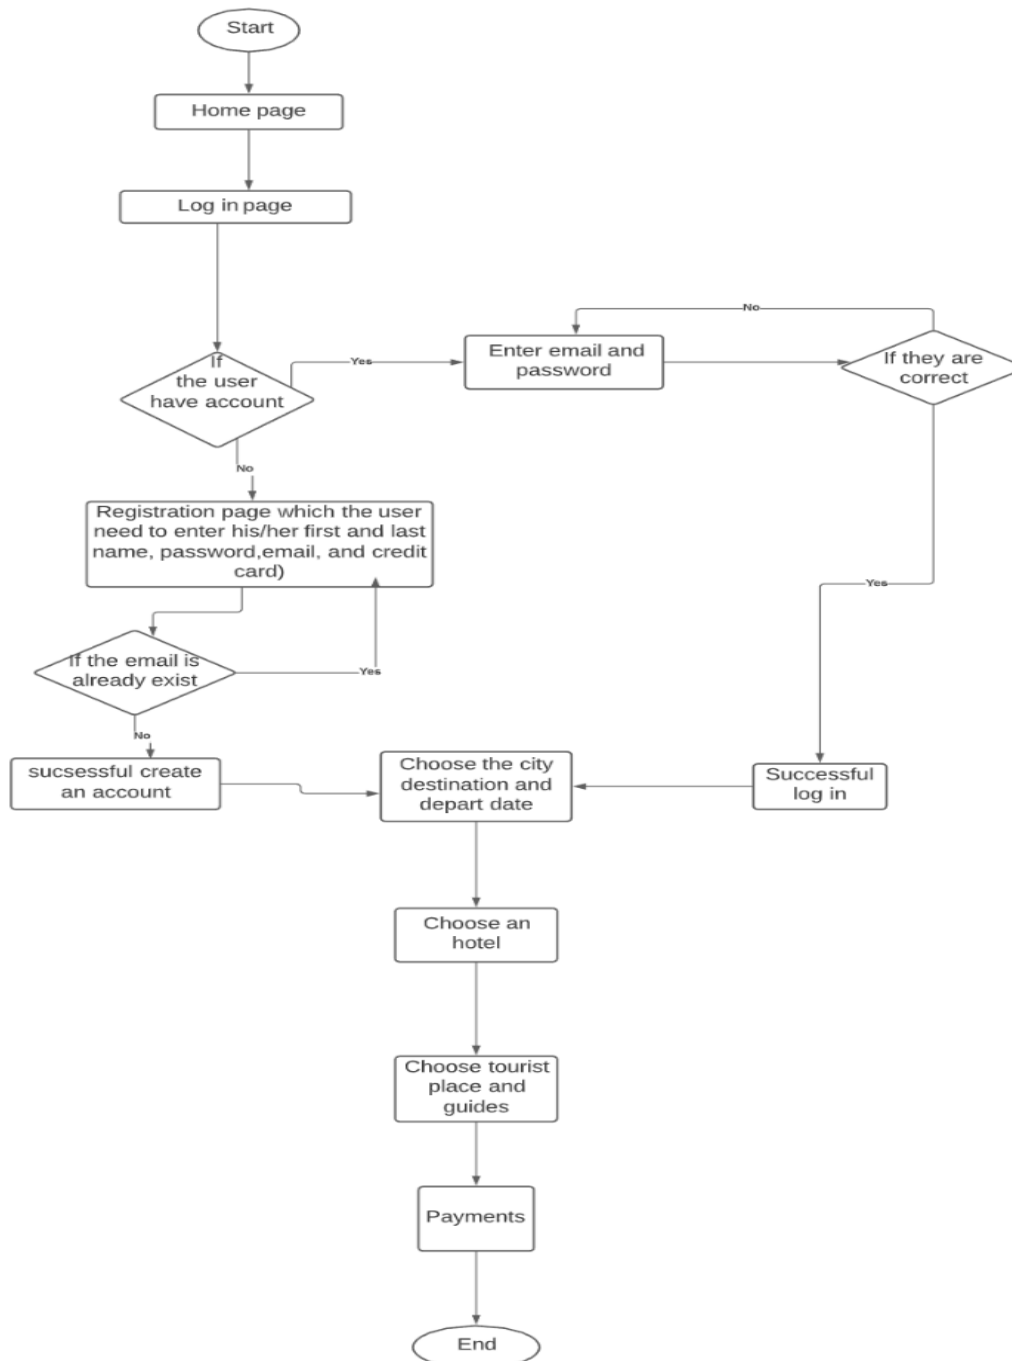

- 1- [My Trip Site](#): It is a site for organizing tourist trips with all its services and with high quality, including organizing entertainment events, providing transportation, and farewell and reception services in various regions of the Kingdom.

- 2- [Landmarks Site](#): A site that provides a wide range of tourism program options for unique and distinct destinations in all parts of the Kingdom and abroad.

4. Procedure

- Flowchart

The flowchart below describes how the project work

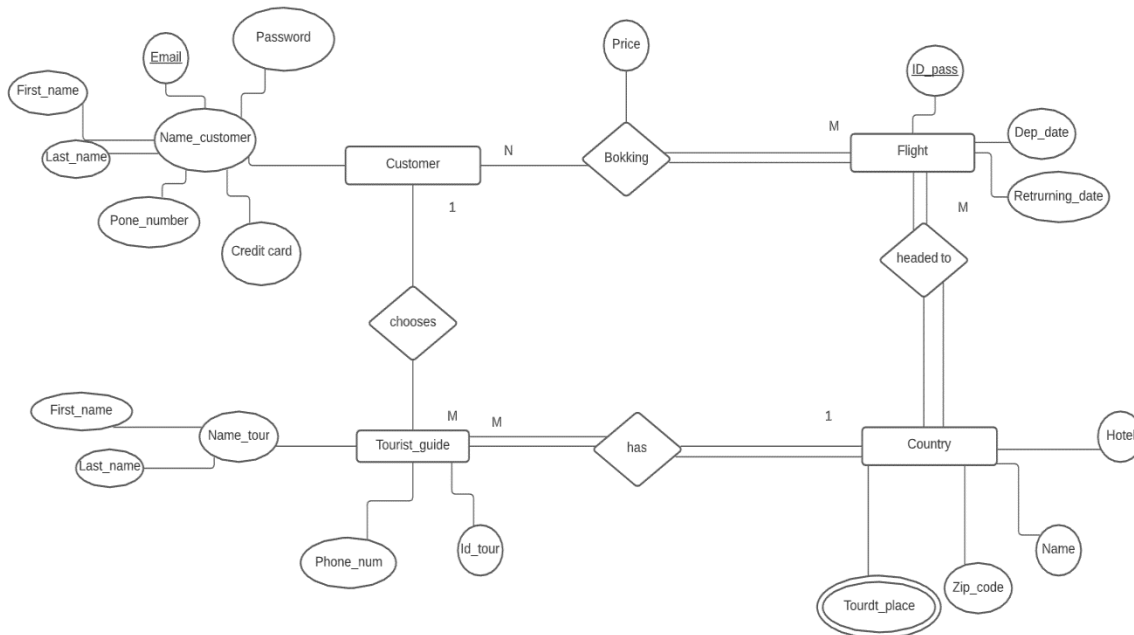

- Input and Output

This table shows what expected output for every input.

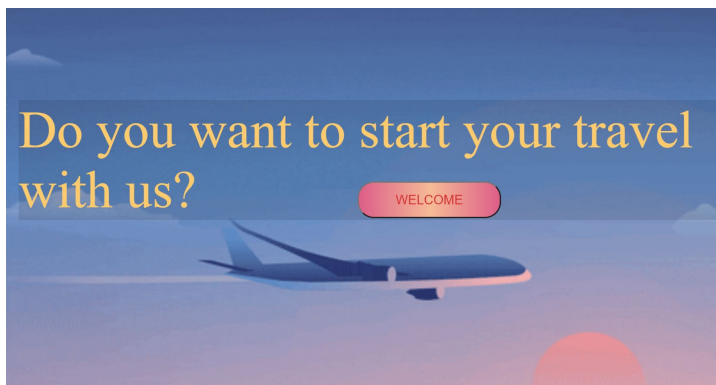

Input	Output
Email& password	Log in
First and last name, Email, Phone Number	Create a new account
Enter depart date	Can choose destination
Choose a hotel	The user can choose his/her trip guider
Credit card information	If the user fills all blank so it is correct payment is successful else failed

- ER database

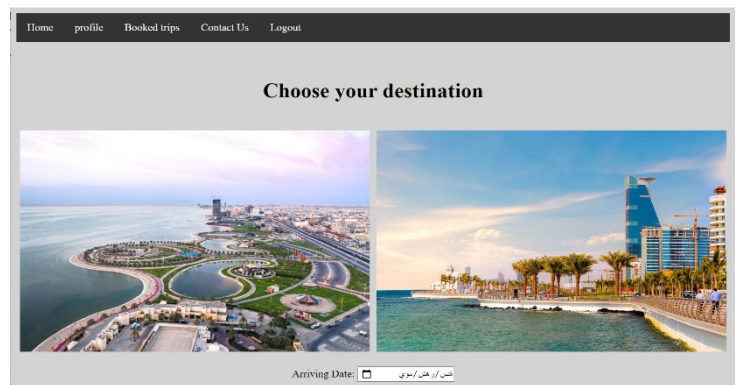

This is the ER diagram for the project

■ Home page:

■ Place and guides page:

▪ Pay page:

The screenshot shows a web browser window with the address bar displaying 'localhost / 127.0.0.1 / webproject'. The page has a dark header with 'Contact Us' and 'Logout' links. A modal dialog box is open in the center, displaying the text 'Please enter your 16 digit credit card numbers' and a blue button labeled 'حسنًا' (Hassna). Below the modal, the form contains three sections: 'CARD NUMBER' with a text input field containing '123456789', 'EXPIRY DATE' with two dropdown menus showing '01' and '2020', and 'CV CODE' with a text input field containing 'CV'. A 'Pay' button is at the bottom. The background of the form is a textured grey.

The screenshot shows the same payment page, but the modal dialog box now displays the text 'Please input number only in CV' and the same blue 'حسنًا' button. The form fields are updated: 'CARD NUMBER' now contains '1234567812345678', 'EXPIRY DATE' shows '05' and '2024', and 'CV CODE' is empty with a red cursor. The 'Pay' button remains at the bottom.

The screenshot shows a web browser window with a payment form. At the top, there's a navigation bar with 'Contact Us' and 'Logout' links. A modal alert box is displayed, stating 'Please enter 3 number in CV' with a 'Close' button. The form fields are: 'CARD NUMBER' with the value '1234567812345678', 'EXPIRY DATE' with month '05' and year '2024', and 'CV CODE' with four dots. A 'Pay' button is at the bottom.

All fields must be filled in. If not, an alert will appear

(In all web page)

This close-up shows the 'CV CODE' field containing four dots. Below it, a small alert box with an exclamation mark icon displays the message 'يُرجى ملء هذا الحقل.' (Please fill this field).

6. Conclusion

This project helps people to decide which places have to go on the city trip with a guider, also the user can choose a flight and a hotel on the same website, it's like do two things at one time. Pay once for all.
